

Kunal Lohtia

415-847-4842 | klohtia1@gmail.com | in/klohtia/ | github.com/KunalLohtia

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Swift, Kotlin, HTML/CSS, C++, C, SQL, R, MATLAB
Frameworks: React/React Native, Svelte, Redux, Node.js, Express.js, Flask
Databases: MongoDB, Google Firebase, MySQL, SQLite, Prisma ORM, Pinecone, Weaviate
Developer Tools: Jira (scrum), Git (CI/CD), Axios, Postman, Expo, Selenium
Other: Pandas, NumPy, Scikit-learn, Langchain, Amplitude Analytics, Unix, Figma

EXPERIENCE

- Software Engineer** Jan 2025 – Present
FloraPulse Davis, CA
 - Led the development of a cross-platform mobile dashboard in React Native and Firebase to deliver real-time irrigation insights from IoT sensors, now used by growers across 15+ major regions
 - Designed and deployed an OpenAI and Pinecone-powered support chatbot to handle 300+ monthly field queries, cutting manual troubleshooting time to under 20s
- Software Engineer (AI)** Jul 2024 – Jan 2025
CourseAssist Davis, CA
 - Scaled AI tutor performance by utilizing LangChain, OpenAI Embeddings, and Weaviate to semantically index lecture slides, transcripts, and source code, boosting RAG accuracy by 35%
 - Integrated Canvas LMS API via webhooks for real-time course content syncing, reducing stale data queries by 90%
 - Built freemium access system using Stripe API, increasing premium upgrades by 22% within 3 weeks of launch
 - Implemented GPT-powered semantic clustering to identify and group similar student questions, allowing instructors to reply-all with one message and reduce redundant responses by 60%
- Technical Product Manager** Jan 2023 – Jan 2024
AggieWorks Davis, CA
 - Spearheaded product design and technical scoping for a student marketplace app serving the UC Davis community
 - Architected a scalable backend system, preparing for 50% projected user growth in the following year
 - Managed Agile sprints via Jira, resolving 60+ bugs and reducing user-reported issues by 24% post-launch
- Software Engineer Intern** Jan 2022 – Jan 2023
Xymob, inc. San Rafael, CA
 - Implemented roster management and team scheduling features for 'InstaTeam' in React Native, enhancing core team collaboration workflows and reducing scheduling conflicts
 - Engineered 90+ reusable UI components, driving a 42% increase in engagement and doubling user retention
 - Automated testing workflows with Selenium, cutting manual QA by 28% and accelerating release timelines

PROJECTS

- Breast Cancer Tumor Predictor** | *Python, Flask, Pandas, NumPy, Scikit-learn, HTML/CSS*
 - Developed Logistic Regression and Artificial Neural Network models to predict breast cancer tumor diagnoses
 - Achieved 98% model accuracy by applying hyperparameter tuning and grid search with stochastic gradient descent
 - Attained precision, recall, and F1-score exceeding 95% for both malignant and benign tumor classifications
- Melody Miner** | *React Native, Redux, Firebase, OAuth 2.0, Spotify API, Axios*
 - Built a music discovery app to generate 100 personalized song recommendations based on user listening history
 - Leveraged Spotify API to seamlessly access their music catalog and track endpoints to generate recommendations
 - Utilized Firebase and Google OAuth 2.0 for user account management, authentication, and track storage

EDUCATION

- University of California, Davis** Davis, CA
B.S. Computer Science | Minor in Technology Management Dec 2023
- Relevant Coursework:** Machine Learning, Operating Systems, Algorithm Design, Data Structures, Object Oriented Programming, Statistical Modeling, Computer Networks, Computer Architecture
